

## **BIOCIDAL MASONRY WALL WASH**

**RAPID SURFACE KILL  
RESIDUAL DRY FILM PROTECTION  
LOW TOXICITY, FREE OF HEAVY METALS & PHENOLICS  
POWERFUL ALGAECIDAL/FUNGICIDAL ACTIVITY**

### **APPLICATION**

For use as a pre-treatment of exterior masonry and rendered surfaces defaced by algal and fungal growth prior to painting.

For use as a general algaecide on ponded roofs, concrete areas and paving stones.

### **EFFECTIVENESS**

The wall wash exhibits a broad spectrum of activity against a wide range of algae including Trentopohlia spp, Pleurococcus spp, Oscillatoria spp and Nostoc spp. Wall wash contains a specific fungicide which confers protection against most major spoilage fungi on paint films.

### **MODE OF ACTION**

The wall wash contains rapidly acting biocides which impart a quick surface kill within several hours of application, together with a highly effective residual algaecide / fungicide. This will remain active on the treated surface for a period of several weeks prior to painting, optimising the activity of a fungicidal paint coat.

### **METHOD OF USE**

The usual precautions prior to painting, such as removal of loose and flaking material, should be taken before application of the wash. The product should be diluted 5 litres of Pro-Struct 101 with 20 litres of water and applied by brush or gentle spraying onto masonry, allowing thorough wetting of porous surfaces. Surfaces should be allowed to dry for 4 hours, then scrubbed clean with fresh water and inspected to ensure all growth is removed. Should growth still be evident, a further wash with Pro-Struct 101 is to be carried out. The surfaces are to be rinsed clean and allowed to dry before painting. (Coverage  $\pm$  8 to 10m<sup>2</sup> per litre of diluted material).

### **CAUTION**

The wall wash is **not** to be used for treating ornamental ponds, fish ponds, etc. The product safety precautions and disposal recommendations should be adhered to. Do not dispose of into waterways, rivers, etc.

### **SAFETY**

Safety glasses, gloves and protective clothing to be worn. Use in well ventilated area. Skin contact to be avoided. Store in cool dry area.
